Grande Prairie Dominion Day Sports To Be Held On Sat., July 1, Recreation Park

Parade, Picnics, Decorated For The Occasion—Significance Of Day To Be Stressing By Speaker—Children Of School Age Admitted Free—Program Includes Wide Range Of Sports—Beaver Lodge Band In Attendance—Athletic Association And People Of Town Join In Welcoming Everyone To Celebrate Canada's Natal Day At Grande Prairie.

All that the Grande Prairie Association is looking for is fine weather to put across the First of July sports in a big way. The First of July is Canada's own day—the day on which this country commences its life as a nation.

In keeping with the occasion, Recreation Park will be properly decorated and the significance of the day stressed by a speaker.

The program includes senior and junior baseball, boys' softball, men's and ladies' basketball, men's and women's tennis.

An all-round track meet will be one of the most outstanding events on the attractive program.

A tug of war between the Grande Prairie and Bear Lake municipalities will be one of the picked stunts of both sections.

Jimmy Allen Air Race Meet, open to canoes, is something new in this part of the country and promises to produce plenty of thrills.

Attractive prizes are offered in every event.

Parks In The West Area Are Proving Very Popular

BEAVER LODGE, June 23.—Saskatoon Mountain and Saskatoon Island parks are becoming increasingly popular. On Thursday, June 23, a picnic party of 200 people of the local neighborhood visited the hilltop and when rain came up found welcome shelter in the open-air pavilion erected last summer. When funds are available to make a good trail up from the east, through local residents, the park will be held in the spots around at Buffalo Lakes on Sunday, July 2.

A brass band has been engaged for the occasion. Arrangements have been completed to have a pipe band come over from Fairview, which will be under the direction of Jimmie Walker, formerly member of the Sexsmith Legion, so all those of the Sexsmith blood will have an opportunity to get an earful of the "divine music."

There will be free treats for the kiddies.

Everyone is welcome.

Mr. Carney stated that there were upwards of a thousand at the Legion's annual picnic last year and the local parks are expected on July 2 this year.

Sergeant-Major Redwood said that there will be no major games and that the Legion's activities as his department is building up a reserve that will meet any emergency.

E. L. Gray Allows Name To Go Before Liberal Convention

PEACE RIVER, June 26.—E. L. Gray, provincial Liberal leader, on Friday met the executive of the Peace River Constituency Association and agreed to allow his name to go before the convention to be held about the middle of July.

It is the desire of the men of the constituency to send Edmonton a group of men who will fight for northern development, and it is this desire that largely influenced Mr. Gray to allow his name to go before the convention.

INEXPEDIENT TO CALL ELECTION AT THIS TIME, SAYS PREMIER MACKENZIE KING

OTTAWA, June 29.—According to a news report here today, Prime Minister Mackenzie King states it is inexpedient to call a federal election at the present time because of the international situation.

Anglicans Going To Celebrate Opening Mission G. P. Area

Anglicans in the Lake Saskatoon district will celebrate an outstanding event on Sunday, July 9, the thirteenth anniversary of the first Anglican Church Mission in the Grande Prairie area. Rev. F. W. Moxhay, rector of St. Michael's, from England to take charge of the field. Their first service was held in a little log building built by Pierre Moxhay, a lumberman, near the lake Saskatoon sports grounds.

At the service to be held at the little church on the hill St. Andrew's, Lake Saskatoon, on Sunday, July 9, at 3 p.m., the Right Reverend Bishop Owen, Primate of the Anglican Church for Canada, will preside.

The present church vestry hope that old members of the congregation will come and join in this service for this historical event.

Everyone is invited.

G.P. Game and Fish Assn. Membership Drive Is Now On

A membership drive by the Grande Prairie and District Game and Fish Association is in full swing. The objective being to increase membership and judging by the response the objective should be reached in a few days.

Following the drive, members will have the opportunity of participating in a prize, either for new or new 50-50 Winchester rifle and five boxes of cartridges.

It is the purpose of the organization to spend the money in the destruction of crows. Five cents for each pair of crow's feet is being offered.

Wanham Annual Sports To Be Held Saturday, July 1

WANHAM, June 28.—The sports committee are all set for the first of July. Programs will include baseball, softball, athletic events, horseshoe competition, and all other kinds of games.

In the evening there will be a dance in the hall, at which a first-class orchestra will furnish the music.

Wanham invites everyone to attend the big annual event.

OLDTIMERS LEAVE FOR VERNON

Ross Beatty of Grande Prairie and R. Brinkman, Spirit River, left on Tuesday morning for Vernon, B.C., where they find conditions satisfactory. They will remain.

Both are oldtimers in this country. Mr. Beatty is a graduate of the Grouard route in 1908 and Mr. Brinkman over the same route in 1907.

THE KING AND QUEEN WAVE AU REVOIR TO CANADA

This photograph, taken at Halifax, records the completion of the first visit to Canada of Their Majesties King George and Queen Elizabeth. It shows the King and Queen standing on the bridge of the royal yacht Empress of Britain, waving farewell to the thousands of Canadians cheering wildly as the vessel proceeds down the harbor to the open sea. The scene was without parallel in the history of the Dominion.

Sudetens At Tupper Now Number 405; More On Way

Friday's passenger train had on board 13 Sudeten families, 40 souls, en route to join other Sudetens at the Gundy Ranch settlement. This brings the total number to 119 families (405 men, women and children). In two weeks time another 11 families will arrive. This will complete the migration to the Gundy ranch, it is understood.

G.P. Livestock Assn. Does \$133,000 Of Business In Year

The annual meeting of the members of the Grande Prairie Cooperative Livestock Marketing Association, limited, was held at the Capitol Theatre, Grande Prairie, Friday, June 23, at 2 p.m. The meeting was called to order by Mr. H. W. Lund, who was elected as chairman of the meeting.

One of the chief items of business was the financial statement for the year showing a loss of \$133,000 in the operations.

Mr. Lund reported that the hog price had held very well. The average net return on all classes of hogs, excepting sows, was 77.70 per cent.

This had compared very favorably with any local prices. In regard to the manager, W. R. Roberts, gave the report that they had wired to John Lund, driller, to have steamed up, a driller would be required.

Mr. Storry will remain on the field, while others of the party will return to Calgary in a few days.

The oil men were accompanied to the well by Robert Cochrane and Lee Alward.

G.P. Midgets Defeat Twilight By Close Score Of 7 To 6

The Grande Prairie Midgets won their first baseball game of the season on Saturday, June 24, when they defeated the Twilight team.

On the night of June 25, the Northern Alberta Railways for the fortnightly stock train service of the year was put into operation and a resolution made that this service be reinstated at the earliest feasible date.

Mr. Edward of directors—H. W. Allen, president; A. Craig, vice-president; J. Harris, R. A. Cunningham, Simon Johnson, George Griffith and Chris Holmgren, were reelected.

The following resolution was brought forward by C. O. Pool of Grande Prairie and seconded by Uri Powell, Sexsmith, and passed by the meeting:

"Whereas we believe this to be a matter of prime importance to the task of reconstruction, therefore be it resolved that we heartily endorse this movement and instruct our board of directors to apply to the appropriate cattle owners necessary for the establishment of a T.B.-free area in this district;

"Therefore be it resolved that we heartily endorse this movement and instruct our board of directors to apply to the appropriate cattle owners necessary for the establishment of a T.B.-free area in this district;

"Therefore be it resolved that we heartily endorse this movement and instruct our board of directors to apply to the appropriate cattle owners necessary for the establishment of a T.B.-free area in this district;

THE NORTHERN TRIBUNE
AN INDEPENDENT WEEKLY
NEWSPAPER

Published every Thursday at Grande Prairie, Alberta.

The Tribune aims to be thoroughly "cove" the local news field with fairness to all sections and parties also to aid in the development of the Peace River Country and help make known the northern inland empire of my province. All news is printed without intentional distortion. The paper's opinions are expressed openly and impartially.

Letters for publication are welcome. A pen name may be used, but the correspondents' names, necessarily for publication, will be as vividly descriptive in publishing as possible.

The Tribune does not implement agreements for facts, but PARTISAN.

Legal and other advertising rates furnished on application.

ALBERTA SAFETY LEAGUE

The Alberta Safety League recently formed with H. W. J. Maddison as president and H. E. J. McLean as secretary, both well known Edmonton men, should receive the hearty support of everyone in the province. The purpose of the League is to carry on an educational campaign with a view of making the streets, highways and industries safer—and homes too.

Briefly, the object of this new organization is to make people accident minded.

The rate at which motor accidents are increasing is appalling. An investigation in Ontario brought out the startling fact that the number of motorists killed in more accidents than do less experienced drivers.

Alberta "Safety Council" will be established in the various cities and towns throughout the province.

The Alberta Safety League is non-profit-making and must play an important part in this great accident prevention cause.

This newly formed organization deserves every support and cooperation.

fullest and go back to school refreshed to tackle the knotty problems outlined in the course of studies.

Dad's Notions

By E. S. Stanley

You'd think election is only a month off if you were to judge from political arguments as they wax.

And herein—to my notion—lies a weakness in our system of government, namely, partisanship. Not the exchange of opinions with an honest heart for facts, but PARTISAN.

The partisan, like a drowning man who cannot swim, is irrational and incommodate. Bereft of reason he makes all sorts of claims and demands, especially when it comes to political avail.

The highest ideal of certain partisans is to cut and slash their opponents unmercifully. Ridicule and filthy jests are not uncommon; the ribald laughter of shallow brats who actually think he has made a point.

But this, I say, is no small weakness of our system, and far removed from its ideal.

Congruent reasoning is the crux of the hour.

Government by the people for the people (not for the few) is our great ideal.

No one party is perfect; and no one party, I believe, has numbered in its ranks honest, conscientious men.

A Tribune writer accuses me of being a Social Creditor, and the local Social Credit group assails me with, "You're not a man, you're a Creditor." You've never been to our group once."

My only notion a person should give when a credit is due—not matter where it is found.

By the same token it is our duty to incur injuries whenever they are found and to expose the cause of those who are oppressed.

John C. Granberry says that he is in complete moral indignation that a certain Christian doctrines emphasize chastity, love, self-control—these are essential for the salvation of man—but the Master Himself cried loudly against ravishing widows' houses, injustice, hypocrisy, and feigned piety.

In light of that before, expedients are often born of shortsightedness.

BETTER HEALTH CAMPAIGN BEING CONDUCTED THIS WEEK

The Alberta Department of Health is conducting a Better Health campaign this last week in June and has issued a pamphlet with the following pitiful paragraphs:

"We spend dollars to cure sickness, often failing to prevent it.

"Canadians spend three hundred million dollars on cures, six million on prevention.

"Two per cent of our population is always sick to work.

"Huge sums are not spent on health, but upon our lack of it.

"It would have been a waste of gasoline, in the Peace River regions, at the actual retail price of 40 cents per gallon, to have failed to get a price of \$121,356,702. What a nice sum.

"In Canada, today, hundreds and thousands of citizens are of Grade physical fitness.

"In 1937 cancer killed about 12,000 Canadians. At least one-sixth of these might have been prevented.

"About 550,000 persons in Canada are suffering from venereal diseases.

"In the last infant under one year died per 1,000 live births in New Zealand the rate is 30. Why should we be higher?

"Our young Canadian mothers lost their lives in childbirth in 1937—over 100 were preventable.

"Respiratory tuberculosis took a toll of over 5,000 in 1937—over 1,000 in 1937—mostly waste of 3,000 lives.

"In 1937 we lost 3,000 lives.

"In the World War, when men had to be inoculated against typhoid, only four cases developed, and the cost was \$40,000. Yet, in a recent year, 1,111 died in Canada. Not one should have died.

"According to a leading distributed by that Department: "The proper development of our oil resources could liberate Alberta from dependence."

Now this Department is either inspired by some noble vision, or it is

the result of a male sex."

The writer of the column, who was present at the demonstration, asked Archie if he intended to make a speech. Archie replied, "That's a fortune was with his grandfather."

Archie replied: "No. This is not a good place to talk science. Most people when they have heard a speech like this want to leave something behind."

He was asked if he intended to make a speech. Archie replied, "That's a fortune was with his grandfather."

Archie replied: "No. This is not a good place to talk science."

ONE OF THE EFFECTS OF THE DEPRESSION

On Saturday, while strolling along Grande Prairie's main thoroughfare, I met a man whom I had not seen for years. He stopped me and called me by my first name, which I always liked.

I observed: "I know your voice and seem to remember you. You must be the life of me I cannot recall your name."

The oldtimer replied: "When I last met you, I was wearing a long mustache. It has grown out and I am unable to develop this upper lip decoration and, to frank, I was proud of it."

"Then," I said, "why did you shave it off?"

My old friend replied: "I am a victim of the depression. As you may know, I have been unemployed and in order to meet the conditions I was forced to smoke my cigarettes with the least amount of waste and to do so in secret. I was afraid to smoke to keep from burning it up."

"Alberta's oil industry promises to bring in important wealth to Canada with agriculture, ranching and gold mining," says the leaflet of the Royal Canadian Institute.

The shareholders of International Nickel have cleared \$1,000,000 net per week, last year, and the farmers are not better off.

Lands and Mines is expecting from the same owners or their kind?

He produces all your oil and gas requirements," says also that Department.

There are 60,000,000 gallons of oil produced in British Columbia in 1937, at a retail price of 27 cents a gallon. In Alberta the average retail price is almost 20% higher, and B.C. has such production to boast of.

Almost four years ago the British Columbia Oil Commission, Mr. Justice A. M. Macdonald of the Court of Appeals, a commission to investigate oil, coal, gasoline prices. His report was submitted to the gasoline prices were as follows:

"Gasoline prices in B.C. are too high," said his Commission. "The present market price, 27 cents per gallon, could be immediately cut, it says, "to 23 cents, and eventually to 18 cents per gallon."

So here's hoping that each boy and girl will enjoy their holidays to the fullest and go back to school refreshed to tackle the knotty problems outlined in the course of studies.

** * *

AWAY WITH THE BOOKS

Now that you have been grinding during the school term, will be carefree at least for two months, the reason being that the summer holidays have been declared by the power that be. School will close tomorrow (Friday), June 30.

Books will be carried home and packed away, not to be disturbed until the fall term commences. What a wonderful feeling!

The young folks of today are just the same as they were in the olden days when we were young. The human being does not change with time so far as his or her emotions are concerned, when the moment they turned their backs on the school for the holidays.

So here's hoping that each boy and girl will enjoy their holidays to the

fullest and go back to school refreshed to tackle the knotty problems outlined in the course of studies.

THE NORTHERN TRIBUNE

90% less than the actual average price in Alberta.

On page 35 of his Social Credit pamphlet, Mr. Aberhart says, "Has the provincial government the moral right to fix prices?" Answer: Yes. The B.N.A. Act gives the province full power over trade to prevent exploitation of the consumers purchasing power. The Dominion Marketing Act required the consent of the provincial governments. The price is fixed by a commission appointed by the government.

The like, a drowning man cannot swim is irrational and incommodate.

And herein—to my notion—lies a weakness in our system of government, namely, partisanship. Not the exchange of opinions with an honest heart for facts, but PARTISAN.

Timely Hints From the Beaverlodge Sub-Station

By W. D. Albright
IT IS A PLEASURE AS WELL AS A DUTY TO SERVE

We plant in hope and pray the rains may fall. We hear the wind and watch the drifting palls. We see the greedy cutworms ravish all that taxes faith, but let us still "play ball."

Timeliness and thoroughness are the two great requisites in tillage practice, whether the job be plowing, cultivation or what.

A neighbor reports excellent success with the wire-weeder for pulling out thick growth of dandelions on land that was first cultivated to loosen it up.

Commercial fertilizer as well as manure is showing effects in the test plots since the May and June showers came to dissolve and distribute the fertilizer.

As the cutworm pupate, grasshoppers crop up for action. In various soil mixtures nymphs are evidence and should be measured. The sodium fluorosilicate oil bait is said to be effective against them.

Summing up the pros and cons of the pasturization of milk for human consumption, Prof. H. R. Thornton of the University of Alberta, in his 1935 article in the *Calgary Herald*, "The proved benefits accruing from pasturization outweigh the unproved possible disadvantages." No conclusive contrary evidence is presented. I am prepared to change my mind."

It is a good idea now, to give hedges their main annual pruning. The wall of the hedge should be vertical, or, if anything, drawn inwardly so that the top branches outward the two at the bottom are unduly shaded and a dense bottom growth is unlikely to be maintained. The top may be any one of several forms, but an oval is quite satisfactory.

The rose grower needs to be constantly on his guard for aphids. If this little pest is not kept in check it will quickly sap the vitality of the plant. Use a Black Leaf 40 spray (nicotinic sulphide) twice weekly. It is a good idea to add a small amount of soap. Spray thoroughly, wetting especially the undersides of the leaves as often as is necessary to control the aphids.

Kenneth M. King has proven a great disturber of the Peace. Within half an hour after his first local radio broadcast phones were ringing. From the Department of Agriculture and of the Experimental Substation were whirlwinds of activity for a while. Of course if Mr. King had not done so the cutworm would have done so even more than it did.

The season is rolling round to the time of ordering spring flowering bulbs for autumn delivery. While tulips are the standbys, others are proving popular. Iris, Siberian squill (squill) is perfectly hardy and an excellent early spring flowering bulb. *Scilla sanguinea* (Spanish blue bell) is also hardy and may be worth a trial if given winter protection. *Narcissus poeticus* is also worth a trial, as it seems to be moderately hardy. One suggestion as to the test of a Muscari, *Chionodoxa*, *Galanthus*, the various anemones and hyacinths.

Results from cutworm baiting have varied sharply according to the conditions of the soil. In heavy soil the worms keep below the surface and are difficult to poison, only a small percentage kill. A 10 cent stipulation on water bait is good time to spread the oil bait. Under such conditions 90 to 95 per cent kills have been obtained. The same stipulation applies to water bait except that it should be scattered just at the hour when the worms are commencing to feed.

A farmer who inoculated alfalfa seed by the soil-gel method and had a week's success, was found that the seed in the bottom of his sacks had sprouted by the time he came to sow it. This could easily happen when the earth was moist and the storage temperature fairly high. Moderately dry storage would likely prevent this, and it would be wise to store the seed in a box rather than an earth floor. The earth-coated seed should probably be fairly well dried before being sacked.

To make a nice hedge the newly planted caragana whips should be cut back to within two inches of the ground with a sharp scissor afterwards. "But I haven't the heart!" protests many an amateur. What would happen if a surgeon

clarkia, California and Iceland poppies, centaurea, mignonette, etc. An interesting snap of this garden was taken in Patmore's 1939 catalog.

This year more ambitious plans are being carried out and several Indians have become interested.

A black insect attacks my trees, principally Northwestern poplars. Last year there were millions. They are also very thick on some trees. A new oil emulsion is recommended.—R.A.B. Wembrey Alta.

Ans. The specimens are of the black aphid, a small louse that attacks poplars. A different species of aphid (each being very closely related to the other) attacks the spruce. Not all enemies often catch up with the pests rather quickly. Otherwise spraying with a mixture of nicotine sulphate and sulphate (black leaf 40) with soap or else with kerosene emulsion may be resorted to for the poplars but not for the spruce as it may spray at this time of year. The spruce should be watched closely and sprayed with nicotine sulphate and potassium sulphate. Nicotine sulphate has largely superseded kerosene emulsion as a contact insecticide, but either is rather slow in action. Nicotine stimulates a luxuriant growth of white clover. While the acidity of the soil, especially lime, restricts the growth of clover, the nicotine stimulates a luxuriant growth of white clover. Some gardeners prefer a lawn without any clover, as it becomes a strong competitor for the legume to kinterkill. Even where winter-killing occurs, the patches are more easily renovated where fertilizer is used.

The practice at present is to broadcast either 10 or 15 lbs. 5-9-8 over the lawn, spring or fall, followed by warm rain, at the rate of two pounds to 1,000 square feet of lawn. This may be done each year or biennially. According to Mr. A. C. G. Dunstan, Fredericton Station, the source of nitrogen in sulphate of ammonia, as to keep the soil in a good acid condition.

On smaller lawn areas enough manure and compost are available, this being applied to the soil in a broadcast manner. On larger lawns that take a much larger quantity of fertilizing materials, commercial fertilizers have proved excellent substitutes for these other materials.

Dusting with arsenate of lead and hydrated lime is the most widely used remedy for the green caterpillars, known as the imported cabbage worm, which bore holes in cabbages and cauliflower flowers. The pyrethrum is non-specific in its action. It can be secured from local seed houses, drug stores, or wholesale companies. Fortunately, the remedies recommended above will control the other destructive cabbage and cauliflower insects, such as the cabbage looper and diamond-back moth.

Blueberry Mountain is a rather detached area of quite good soil. In 1919 a band of soldier settlers arrived there, most of them working for the Canadian Smiling Face Trust Fund. Of course they were too generous. It is the donor, not the talker, who deserve the credit.

Nineteen centuries ago a Saviour demanded "Why call ye me 'Lord, Lord,' and do not the things I say?" The exact words often asked him the question. Instances like that at Blueberry encourage him to persevere.

Blueberry Mountain is a rather detached area of quite good soil. In 1919 a band of soldier settlers arrived there, most of them working for the Canadian Smiling Face Trust Fund. Of course they were too generous. It is the donor, not the talker, who deserve the credit.

If the plants have to be treated shortly before being set out, a mixture of ash, gypsum and powder, one part to three of hydrated lime or flour. The pyrethrum is non-specific in its action. It can be secured from local seed houses, drug stores, or wholesale companies.

Fortunately, the remedies recommended above will control the other destructive cabbage and cauliflower insects, such as the cabbage looper and diamond-back moth.

The Control Of Powdery Mildews

(Science Service News)

Many people have noticed an unsightly powdery white growth on various plants, especially trees. Powdery Mildew is a disease caused by a parasitic fungus which lives on the surfaces of the leaves and stems and draws nourishment from the plants it invades. It is most destructive to the outer cells of the affected plants. There are different species of powdery mildew, but they are very similar in appearance and habits. They are especially troublesome under humid conditions. Judging from specimens received at the Dominion Laboratory of Plant Pathology at Saskatoon, delphiniums, sweet peas, roses, and cherries, black currants, and gooseberries are among the plants most frequently troubled by these diseases in western Canada. However, many other plants may be come affected.

By the use of proper methods these diseases can be controlled and their spread prevented. Sulphur dust is an excellent material for the prevention of epidemics of Powdery Mildew. At the rate of one pound to the acre sulphur should be applied to the plants which are likely to become affected. It is preferable to use a small hand dusting apparatus, but for small jobs a pepper shaker or a muslin bag may serve the purpose.

In any case a clean sulphur should be used which will not be blown by the breeze over the plants. It is best to dust the plants when they are dry, otherwise the sulphur will not be evenly spread over the surface of the leaves.

The sulphur should not be applied too heavily or injury may result at high temperatures.

In a fine rain soon after the dusting has been done the operation should be repeated after the foliage dries off. When the mildew has started a fine hold, however, it is noticed, it is necessary to use a spray to dislodge the fungus. A solution of one ounce of potassium sulphate to a gallon of water will kill the fungus on the plants, but it should be followed up with a dusting of sulphur to prevent reinfection.

Underexposure is the most frequent fault in amateur snapshots. A picture printed from an underexposed negative has a harsh appearance. The shadows are too dark, and by comparison the bright areas appear excessively bright. If many of your pictures have this appearance, you should practice giving full exposures, either through full stops or by using a longer shutter time.

Modern films have broad exposure latitude, to take care of reasonable errors in exposure. But we should not ask too much, and we should never overexpose. An overexposed negative always produces the best print. When we are in doubt, it is usually wiser to give a full exposure rather than one that may be too short.

These are typical correct exposures for the "chrome" type films that most of us prefer for outdoor picture taking:

THE NORTHERN TRIBUNE

Fertilizing Lawns

(Experimental Farms News)

A lawn benefits materially from adequate fertilization in that the plant food supplied not only causes a greater growth of the species already present, but augments the predominance of the better types of grasses than poor land will support. In New Brunswick the most successful grass is Kentucky blue, according to state R. G. White, Dominion Experimental Station, Fredericton. Another reader a several years ago felt that Kentucky blue was the best grass in the Fredericton Experimental Station. It was found that Kentucky blue moved from long grass into third year grasses due to overpopulation; thus it became a waste of well fertilized and mown at lawns. It was suggested that the treatment and reacts the same as a pasture. These results were secured on a naturally poor and acid sandy soil.

Complete fertilizers have given better results than single elements used alone. The nitrogen stimulates the grass, while the phosphorus helps to develop the root system. Potassium sulphate (black leaf 40) with soap or else with kerosene emulsion may be resorted to for the poplars but not for the spruce as it may spray at this time of year.

The spruce should be watched closely and sprayed with nicotine sulphate or with a mixture of copper sulphate and lime. The spruce prefers a lawn without any clover, as it becomes a strong competitor for the legume to kinterkill. Even where winter-killing occurs, the patches are more easily renovated where fertilizer is used.

The practice at present is to broadcast either 10 or 15 lbs. 5-9-8 over the lawn, spring or fall, followed by warm rain, at the rate of two pounds to 1,000 square feet of lawn. This may be done each year or biennially.

According to Mr. A. C. G. Dunstan, Fredericton Station, the source of nitrogen in sulphate of ammonia, as to keep the soil in a good acid condition.

On smaller lawn areas enough manure and compost are available, this being applied to the soil in a broadcast manner. On larger lawns that take a much larger quantity of fertilizing materials, commercial fertilizers have proved excellent substitutes for these other materials.

From Britain's painted sons I came, And Basket is my barbary name.

But now I am so modish grown That Rome would claim me for her own."

It is now sight in Europe to see groves of trees from which long twigs have been taken yearly for these uses. The stumps are cut and the trees pollarded. Pollarded willows are used to grow to a great height; yet when spring finds them again, they are as firm as civilisation, and that in its primitive stages.

But now I am so modish grown That Rome would claim me for her own."

It is now sight in Europe to see groves of trees from which long twigs have been taken yearly for these uses. The stumps are cut and the trees pollarded. Pollarded willows are used to grow to a great height; yet when spring finds them again, they are as firm as civilisation, and that in its primitive stages.

From Britain's painted sons I came, And Basket is my barbary name.

But now I am so modish grown That Rome would claim me for her own."

Junior Baseball Team Defeats Old Players

One day last week the oldtimers in baseball thought it would be a good idea to let the junior baseball team little tryout and give them the benefit of their experience. They would not be too hard on the youngsters, we tried to try not to trim the juniors too badly.

To make a long story short, the juniors trounced the oldsters to the tune of 12 to 4, and they won their merits—and it was no give-away game on the part of the oldtimers.

For the juniors the battery was Bob Shaw and Jack Spyry; and for the seniors George Cameron, Ray Roads, and Domstad.

W. A. Brown handled the game.

SEXSMITH FLOWER SHOW TO BE HELD FRIDAY, JUNE 30

The Flower Show of the Sexsmith Horticultural Society will be held here in the building just immediately south of the Sexsmith Supplies on Friday, June 30. Everybody is welcome to exhibit and there will be no entrance fee, so bring in your flowers.

SEXSIMTH NEWS PARAGRAPHS

Mr. and Mrs. J. A. Weicker, Miss Muriel Weicker, Mr. J. P. McLean who had been away for a few days at Edmonton, Calgary and Banff, returned home by car on Sunday night last.

Mrs. and Mrs. Sveinbjorn of Kandor, Saskatchewan, Mr. and Mrs. Sveinbjorn and Mrs. Thorstom of Glenbow, Manitoba have been visiting Messrs. Cris and Helge Helgason for the past week. The Helgasons are sister of the Helg brothers. Son Sveinbjorn together with the Gudlaugson family, they held a picnic at Dunvegan.

Mr. Johnn Cochrane of Coronation is visiting at the home of Mr. and Mrs. Vic Nelson. Mr. Cochrane is a brother of Mrs. Nelson.

Mr. "Dad" Bonnen of Teepee Creek has been visiting in Sexsmith over the week-end.

Vic Spicer's junior baseball team has been entered in the tournament to be held in Grande Prairie on July 1.

Boyd's Show of Peace River will present "The Man in Blue" at the theatre here on Saturday, July 1. The next offering will be "Mad About You" starring Dennis King, on July 15. Keep this date in mind.

Dr. and Mrs. Gamey returned Sunday night by car after visiting the outside for several weeks.

THE NORTHERN TRIBUNE

BELLOWS NEWS

WANHAM SUCCESSFULLY DEFENDS CUP

BELLOWS, June 26.—The Belloys School softball team travelled to Wanham last Thursday night for another challenge game for the district cup held at Wanham. After five innings of exciting ball the Wanhamites were in the lead, 3-1, and so once again they defended the cup successfully.

Tansem and Wells were the battery for Wanham, with Urness and Annie Kosch doing the work for Belloys. However, we cannot say that some of the cryptic remarks slanted at the Belloys children by grown-up folks were nice ones. We grown-ups like it, and can take it, but we shouldn't insult children.

FAUST, June 26.—Aspen Glen is still on the map—that is, it is here.

With the gasoline pump removed, we don't see those who used to stop for gas, but cabins rent as usual and some choosing to use the camp grounds for tenting.

Rev. Geo. A. Shields and family from Beaver Lodge came here en route to Mr. Shields' new church in Ontario. Accompanying as far as Winnipeg were Mr. and Mrs. J. G. Whyte and two grandchildren, Mrs. and Barry Carson.

Mr. and Mrs. B. Thrones and two grown daughters, Queen Heights.

Returning to Sexsmith were R. W. McLaughlin, Harry Housman of Sexsmith, and Harold Simons of Fort Saskatchewan.

Mr. and Mrs. A. A. Suensons, Glenbow, Man., and Mr. and S. S. Stedman, Glenbow, Man., and Mrs. H. A. Thorstenson were here Sunday night on their return home from visiting relatives at Sexsmith.

Calling a week ago were Mrs. Heber Keay and party of women.

A number of others whose names escaped us.

The first camp was at least two weeks ahead of a year ago.

Strawberries are starting to ripen on ten days ahead of last season.

FAUST NEWS

FAUST, June 26.—Jack McCrae, who was badly bruised at the logging camp on the north side of the lake, had to return to the hospital at High Prairie for further care. He turned home Sunday.

George Davies, one of the boys lost in the accident, was taken to the hospital, also went to the hospital last week. The shock and the exposure unstrung his nerves badly.

Freddie Burnell, who was threatened with blood poisoning with a sore finger, is better.

Bill King's Sunday were Mr. and Mrs. Tom Sloan, their boys, his mother and Johnnie Hunt.

William Bannister took his truck, packed full of school children, Tuesday night, to Canyon Creek, where the school boys played softball with the school boys there and lost the game, 15-17.

The Canyon Creek boys expect to play Faust at Faust Wednesday, and on Thursday Faust boys and girls will go to Drifltite to play there.

Earl Frood has taken a crew to his Sauteen mill for operations there.

FATHER LOSES EYE

Albert Provost (14) is a lonely chap here. His mother died some time ago and his father was working at the sawmill. Mr. Provost, the son of McRae, narrowly escaped death when he was struck a glancing blow by a flying piece of steel from the circular saw he was turning. The Word to Albert is to the effect that his father will be all right but that he can't return to the hospital at Edmoonton till winter.

Mr. and Mrs. Peterson, the letter writer of Mr. Newell, have built a house adjoining Newell's. They recently came from Saskatchewan to settle here.

GOOD SPEECHES HEARD AT BELLOWS BRIDGE PICNIC

BEAVER LODGE, June 26.—The picnic held at Halcyon Bridge was a success and although the crowd was rather small due to weather, the speeches were very enlightening.

Mr. Sherrill of Lethbridge gave an interesting talk on the conditions of the province and encouraged everyone to cooperate with the government.

Mr. Baker, M.L.A. from Clover Bar, gave an interesting speech and explained the work of the Treasury Branch House. This is one thing or topic that everyone enjoyed and which it was felt all should try to tell Alberts to be a better place to live in.

After the speeches a community supper was held and everyone had a real good time chatting with neighbors.

After supper a softball game was played by all who were able to play and everyone prepared to leave, fully satisfied that they had had a very pleasant evening.

G. I. T. CAMPS

The C. G. I. T. camps will be held at Lake Saskatoon as usual this summer. The dates are: July 3-6, for campers who are 12 years of age or over; July 10-13, for senior camp (girls 12 to 19 years); July 16-25 (camp girls 12 to 14 years); July 22-29 (camp girls 15 to 19 years). All girls are welcome to go, if they register with Mrs. Rex Harper, Grande Prairie, by July 1.

Simple "mask boxes" make it easy to take pictures with trick "frames." Above: "keyhole" picture made by cutting a keyhole in a box showing placing of camera and cut-out mask.

Upper right various cut-outs: keyhole, gothic window, field glasses, cactus silhouette, porches and mouth.

SNAPSHOTS WITH TRICK "FRAMES" are easy to take, and fun to show. You can get pictures apparently made through keyholes or field glasses—and many other novel effects.

Obtain an ordinary cardboard box. It should be about twelve inches one way, and eight inches or more the other. Exact size doesn't matter. Cut a hole in the middle of one end, a bit larger than your camera lens. Cut a large opening in the opposite end, and over the top of the "keyhole" cut out of cardboard (see drawing above).

It is a good idea to paint the inside of the box black, to guard against stray reflections.

Now, place the box on a firm support, such as a table. Sight through

HERMIT LAKE

HERMIT LAKE, June 26.—The Belloys School softball team travelled to Wanham last Thursday night for another challenge game for the district cup held at Wanham. After five innings of exciting ball the Wanhamites were in the lead, 3-1, and so once again they defended the cup successfully.

The Club met last Thursday at the home of Mrs. Cranston. A large number of members were present and several visitors.

The school picnic is to be held on June 29, at the school.

The Island softball team played Lake Saskatoon last Friday, the Island winning.

WEMBLEY NEWS

Death of J.S. Taylor Shocks Wembley And District

WEMBLEY, June 26.—The funeral of John Hill (17), second eldest son of Mr. and Mrs. Joseph Hill of the Wembley Lodge on Sunday, June 24, was held in St. Mark's (Anglican) Church on Thursday, June 21, at 2:30 p.m. Rev. Mr. Calland of Beaver Lodge officiating.

The church was filled to capacity, a large number standing outside, to pay their last respects to the deceased.

DEMONSTRATIONS IN JERUSALEM CONTINUE AGAINST NEW PROPOSALS

The inscription on one of the streets of Haifa, in protest against publication of the White Paper by the British government, reads: "We know only one book—the Holy Bible." Demonstrations still continue in Jerusalem against the new proposals for Palestine and curfew law exists in the majority of the towns and cities in the Holy Land.

CANADIAN DELEGATION TO CONGRESS OF INTERNATIONAL C. OF C.

En route to Copenhagen to join representatives of 41 other nations in discussion of world trade, the Canadian delegation to the congress of the International Chamber of Commerce are seen above as they left Quebec on the Empress of Australia. Members of the delegation are from Montreal, Toronto, Windsor, Ontario, and from Winnipeg, Edmonton, and are under the leadership of R. F. Jeffer, chairman of the Canadian Chamber of Commerce.

EXPERTS EXAMINE BRITAIN'S NEW WARPLANES

A picture taken at Northolt aerodrome, England, as aeronautical experts examine one of the new fast bombers which are now being produced in mass production by the British aeroplane factories for the R.A.F.

THE WHOLE FAMILY ARE MODEL YACHT BUILDERS

Making models of old sailing craft is a family business in the home of Eugene Leclerc, retired sailor of St. Jean Port Joli, Quebec. Each member of the family, except the baby, is assigned to a particular task. Father carves the hulls and erects the masts. The older boys make anchors, cabin lifeboats, etc., while the daughters attend the making of the sails, and Mrs. Leclerc attends to the rigging and varnishing of the models. Above is a view of the Leclerc family with some of the fine model craft they have made.

HONORED BY QUEEN

Allan Kimpton, 18, young artist who inherited his talent from his late father, has been honored by Queen Elizabeth, who accepted two drawings of herself and the King. Allan is a messenger in the Department of the Secretary of State.

YOUNG CANADA SAILS FOR ENGLAND TO JOIN OVERSEAS YOUNGSTERS

These five young Canadians sailed from Quebec on the Empress of Australia to join British youngsters overseas in welcoming Their Majesties the King and Queen back home after their trip to Canada, the United States and Newfoundland. All from Winnipeg, the happy quintet accompanied Miss Alice Ede, Agency secretary, Overseas Education League, and after the royal welcome are now visiting English homes and schools with other Canadian students who are touring Europe under the auspices of the League.

THE AMERICAN AMBASSADOR HONORED BY CAMBRIDGE

Cambridge University honored Lord Chatfield, First Sea Lord, and Mr. Joseph Kennedy, American Ambassador in London, when they conferred degrees on them recently. This picture shows the procession with Lord Chatfield and Mr. Kennedy leading.

MARLENE DIAH—WITHOUT HER JEWELS

Screen player Marlene Dietrich, the girl with the "million-dollar legs," sailed for Europe with her husband—but without jewels valued at \$100,000. The United States government held the jewels to guarantee a lien for an alleged deficit of \$224,000 in her 1936-37 income taxes. Marlene's \$4 trunks were ordered taken off the Normandie and then put back again when she left the jewels as a guarantee.

SCENE OF ONE FAR EAST "INCIDENT"

Here is a view of Tientsin, China, scene of one of the Far Eastern "incidents" now occupying the attention of England, France, and the United States. Japanese troops began a blockade of the British and French concessions in Tientsin after failure of a last-minute British proposal to settle a dispute over alleged Chinese terrorists. Japanese military officials were said to be against a compromise.

LION HUNT—IN INDIANA!

Here's the beginning of a lion hunt near Rensselaer—in Indiana! The hunters are Larnie McLean, expert lion tracker, and members of his family and their trained hounds. The quarry is a huge mountain lion that had been terrorizing the countryside for weeks.

EDMONTON EXHIBITION

Celebrating Royal Visit Year

July 17-22

"Where City and Country Meet" perhaps more fittingly describes the Edmonton Exhibition than any other fair on the North American Continent. Started at a local fair 61 years ago, the Exhibition has grown year by year until it stands as one of Canada's great annual exhibitions. Each year the management strives to expand its scope, adding new competitive classes, stepping up the prize money and larger purses . . . new entertainment features, and all to make the Edmonton Exhibition an attraction to the more and more inviting to out-of-town visitors and folks alike. The Edmonton Exhibition is in every truth "Where City and Country meet" for mutual enjoyment and mutual admiration of each others' achievements . . . northern Alberta's big annual holiday and carnival.

FOLLOWING CLOSELY, AFTER THEIR MAJESTIES' HISTORIC VISIT, THE EXHIBITION THIS YEAR CARRIED ON THE ROYAL VISIT WITH A MORE BEAUTIFUL, MORE EXTENSIVE AND COLORFUL SCHEME THAN EVER ATTEMPTED ON ANY EXHIBITION GROUNDS IN WESTERN CANADA. THE SHOW IS A FAIR, A CARNIVAL, A FESTIVAL, A CELEBRATION, A MELT OF ALL THE BEST IN SHOWS, RACES, ENTERTAINMENT, DANCE, DRAMA, MUSIC, CIRCUS, ETC., ETC.

Following closely after Their Majesties' Historic Visit, the Exhibition this year carried on the Royal Visit with a more beautiful, more extensive and colorful scheme than ever attempted on any exhibition grounds in western Canada. The Show is a Fair, a Carnival, a Festival, a Celebration, a Melt of all the best in Shows, Races, Entertainment, Drama, Circus, etc., etc.

Province of Quebec

Eastern Townships and Ottawa Valley—Moisture conditions generally favor the growth of grain, and warmer and warmer weather is needed. Seeding and planting of root crops are completed and growth generally satisfactory. A great deal of work in prospect. Pastures are in good condition. Fruit trees blossomed well and strawberries show good promise.

Lake St. Lawrence and St. John District—Seeding and planting of root crops are nearing completion. Pastures are in fair condition.

Ontario

A good start in fall wheat is headed out and a satisfactory yield is indicated. Spring grains are showing rapid growth and corn and oats are well along. Some winter wheat is now in the ground. Cuttings are in good condition. Fruit trees blossomed well and strawberries show good promise.

Toronto—To the entertainment ar-

ranged for this year's Show, no effort has been spared to assemble top performers and attractions. Only an institution such as the Edmonton Exhibition could present such a galaxy of talent at so nominal a cost. For the first time in history the Exhibition will present Banff and Carruthers magnificent revue. "The Show," the unique and acclaimed as one of the clearest and most exciting ever arranged for the outdoor stage.

The Midway, the carnival spirit will reign supreme, with the re-vamped and greatly enlarged Royal American Shows.

One of the many new and curious things you will see for the first time in your life is the unique Tropical Show, showing 40,000 different kinds of tropical insect life, and from every country in the world: gorgeous butterflies, giant beetles, winged wings; great gray moths from South America, measuring 13 inches across their wings; beetles 6 feet long and weighing over one-half ounce; worms from Australia, 10 feet long; spiders of all kinds, including the deadly Black Widow, praying mantis, etc.

With show entries pouring in from far and near, and every inch of space in the Manufacture Building sold out, full more price to the incoming date . . . scores of new exhibitors, the biggest and gayest Exhibition ever staged in the Capital City will be fitting to great perfection.

A trip to Edmonton, Fair Week . . . what finer holiday for every member of the family? Visit the largest the prime stock and agricultural exhibits—the gorgeous Horticultural Show . . . a couple of afternoons at the races, and off two smarters on the nose of the grandstand comes the board . . . an evening on the grandstand for "The Show of the Century" . . . a whirl around the city where folks really laugh . . . see the interesting exhibits in the Manufacture Building, then out at night downtown for a movie—a sightseeing trip to Edmonton's interesting places—the Parliament Buildings, parks, the Zoo or swimming pools.

Don't miss the Exhibition this year! Get yourself a strip of tickets at the reduced entrance price, buy a ticket for a dollar and come on to Edmonton Fair Week. If there is no one selling them in your locality, just phone the Royal American Show office dollar and send it to the Edmonton Exhibition Association and your tickets will be mailed immediately.

BANK OF MONTREAL CROP REPORT, No. 3

MONTREAL, June 22.—Bank of Montreal crop report, issued today, is as follows:

General

In the Prairie Provinces well distributed heavy rain showers have been helpful and crop conditions on the whole continue favorable. Wheat is fairly even stand and is stooling satisfactorily. Crops were generally in a period of bright, warm weather. Cutworms and wireworms have caused slight damage. The development of grain crops has been hampered by the cool wet weather and so far little injury to crops has occurred from this source. Patches are in need of control.

In the Prairie provinces moisture conditions are favorable. Seeding and planting are at completed. Growth, though slow, is static. Further, Ontario continued cool weather has retarded growth and rainfall is required in some western sections, but generally the crops are favorable.

In the Maritime Provinces the season is backward and warm weather is required to promote growth. Orchards give good promise. In British Columbia frequent rains have promoted heavy growth of all grain, but the cool and dry weather with sunshine is not able to prevent deterioration.

Alberta

The condition of the grain crops is better than at this date last year. Substantial Black Sea shipments.

Ann. U.F.A. Convention
in the New Capitol Theatre, Grande Prairie on
Friday, July 14th
commencing 2 p.m.
Discussion: "Farm Problems and Co-operation"

The province has received the best soaking rains in years, except in the Peace River District, where local rains are needed. Cool weather has promoted stooling and checked pastures. Pastures are in excellent condition. Sugar beets are promising.

Saskatchewan

Crops generally are progressing favorably, especially rainfall over most sections of the province has further improved moisture conditions. The rainfall has been particularly beneficial in the somewhat drier districts where crops were suffering from drought. Due to cool weather, growth has been slow, but the low temperatures have held grain growers in check. Frost was fairly general in the eastern districts, but little damage is reported.

Manitoba

Beneficial rains have fallen over most sections of the province and crops generally are making satisfactory progress. Growth is fairly even and in some districts early sown northwestern district precipitation has been light and additional moisture is required in some localities. Grasshoppers have so far caused little little damage to crops. Some slight frost damage is reported.

Province of Quebec

Eastern Townships and Ottawa Valley—Moisture conditions generally favor the growth of grain, and warmer and warmer weather is needed. Seeding and planting of root crops are completed and growth generally satisfactory. A great deal of work in prospect. Pastures are in good condition. Fruit trees blossomed well and strawberries show good promise.

BANK OF MONTREAL CROP REPORT, No. 3

MONTREAL, June 22.—Bank of Montreal crop report, issued today, is as follows:

General

Official dispatches from Rome tell us that the Italian people have been ordered to reduce their consumption of coffee to the minimum and, if possible, to drink it at all. "In this way," the order continues, "Italy will outsmart those countries which are selling coffee to us only for our merchandise in exchange."

Further dispatches from Italy are to the effect that same day, the government has been provided with a new artificial fibre, produced in Italy, that is expected to take the place of cotton and wool.

Here we see the harmful results to the producers of wheat in Canada, of cotton in the United States, and of wool in Australia. The immediate

consequence of this will be that wheat, cotton and wool will be less expensive to buy with foreign merchandise and goods which, at all, is the only money that Italy and many other countries possess.

The inevitable results of this stupid high tariff restriction policy is obvious. Foreigners who have been buying to us are forced to develop substitutes for our raw products, and so there will be less and less demand for wheat, cotton and wool. The result will be that the producers of these commodities, in the end, will most certainly be harmed.

Following factors have tended to raise price. Excellent Italian crop outlook apparently dissipated by excessive rains and rust. Official figures indicate a large reduction in the Australian wheat exports in some Argentine wheat arrivals—Excessive rains reduce crop output and therefore the favorable outlook in the Balkans.

Following factors have tended to lower price. Difficulties at the Canadian, American and Australian wheat to the Orient. Spanish wheat crop reported exceptionally big.

Further, widespread rains on the continent are causing harvesting under way in Europe. Polish crop conditions slightly above average—All

Australian states receive unusually good rainfall.

Alberta
The condition of the grain crops is better than at this date last year.

Substantial Black Sea shipments.

CLAI MONT NEWS

DEATH OF MR. EDWARD GILBERT JOHNSON OF CLAI MONT

With sincere regret I announce the death of Mr. Edward Gilbert Johnson, which occurred on Thursday, June 21, at the Grande Prairie Municipal Hospital.

Mr. Johnson (or Ed, as he was familiarly known) had been in poor health for the past three years and practically retired from active service, his loyalty to the post office and stern resolution kept him going and satisfied that he was at least present and doing duty equal to his strength, and as always faithful to his responsibility.

Mr. Johnson came to Clai MONT in 1919 and remained in the Grande Prairie Hospital until 1921, after which he was in the employ of Messrs. Ismond & Clark, general hardware dealers, in the same position he had held with the Curtis store, until 1926, when he was employed by Mr. Bergin, who had recently opened a grocery store on June 21.

In his earlier days Mr. Johnson engaged in the motorboat transport and freightlining business along the Crowsnest Trail, Tawatinaw, Swift Current, Saskatoon, and Gretina, Manitoba, where he was in his employ. Gordon Ismonds & Sons Ltd., who split up the year prior to coming to Clai MONT.

Mr. Johnson came to Canada 57 years ago, at the age of 18. Born in Honesdale, Pennsylvania, a native of New Jersey, a native and honorable race of Norsemen of whose lineage Britons are proud to own. Mr. Johnson was a man in the sense of the word, courageous to the last, and in his life honorable, honest, generous, a true friend to all and an enemy of none.

His demise is truly felt by a great number of people in Grande Prairie and Peckover. He gave his life to mourn his loss a sister in Honesdale, Norway, and a brother, Thomas Johnson, in Seattle.

Mr. Johnson was a traveler of some importance, having crossed the continent of America east to west and well read in history. After his return to the Pacific Northwest he went to the South Sea Islands and New Zealand—the land of the Southern Cross from the land of the Midnight Sun.

"Ed" Johnson was a vivid and talented raconteur of events and scenes and an interesting conversationalist. In creed he is broad and generous, a student of the Old Testament and well read in history. His attachment to being a member of the Masonic Body and a Companion of the Royal Arch Chapter Masons.

A friend to all and an enemy of none.

ERNEST V. BERGIN.

Seedling is practically finished and planting of root crops in most districts and pastures are generally in fairly good condition. Apple trees in the Annapolis Valley are heavy in bloom and some are in flower. Strawberries show an average bloom.

British Columbia

Hay and alfalfa crops are ready to harvest. Tomatoes and potatoes have sufficient moisture and may deteriorate unless given a good deal of water. Alfalfa gives promise of a better than average crop. Hops are in excellent condition. As the true June drop is not over, it is too early to estimate the fruit crop, although the fruiting crop is very good and expect for a short time to be fully ripe.

SOFTBALL POPULAR

Softball is proving a popular pastime here. Last Sunday the home team defeated Silver Wing on the home field. For a short time the ball was out of play due to a foul ball, but the players soon got it back and the game was continued.

Local and General

Mrs. Andrew Alt arrived home from Edmonton on Friday's train.

Mr. and Mrs. R. H. Rycroft, Mrs. Ted Rycroft of Smoky Heights and Sam Rycroft of Spirit River, who was spending the weekend here, were parents' visitors Saturday. They report beautiful crops in the Smoky Heights district.

George Wisdom of Dimsdale was a visitor to Grande Prairie on Saturday. George, who is in his seventh year, was looking in the pink and to The Tribune reporter he said that he hoped to live to at least a hundred.

John Hancharuk and Mr. and Mrs. Pete Bambush of Webster were business visitors to the Prairie on Saturday.

E. Aquilon, inspector for the Bank of Montreal, is inspecting the Grande Prairie branch.

Pearce Walker, who owns a fruit farm in Florida and who was visiting his brothers, Russ and Harry of Halcyon, left for home on Friday's passenger.

Rev. J. A. Mitchell and Mrs. Mitchell travelled through Grande Prairie on Friday's train for more, where Mr. Mitchell will take charge of the United Church. The Mitchell's have made their home at Mr. Mitchell's new home in Poulsbo for the past year. Rev. Mr. Mitchell has been in the Peace River for the past ten years, having charge of the Spirit United Church for some time.

T. J. Reilly, of the postal service was a passenger on Friday's train from the Block to Edmonton.

Ole Olmed and Lloyd Toffeland of Valhalla Centre were business visitors to Grande Prairie on Friday. They reported good crops in their district.

Mr. and Mrs. Bill Belfry, who live in Grande Prairie during the past month on Sunday returned by car to Grande Prairie.

Mr. and Mrs. Oakford of Hythe were business visitors to the Prairie on Monday.

Mr. and Mrs. T. Griffith and Mr. and Mrs. Douglas of Edmonton spent the week-end in Grande Prairie, guests at the Donald Hotel. Mr. Griffith and Mrs. McLean limited and Mr. Douglas Blowey-Henry.

John Cleasby, president of the C.C.F. in the Peace River Block, was a visitor in Grande Prairie on Monday and Tuesday. Seen by The Tribune reporter, Mr. Cleasby stated that the C.C.F. meetings held in the Block were largely attended.

The following from Peace River are holidaying at Grande Prairie: Mrs. J. A. Peavy, Mrs. H. Keppler, Miss C. Gaudet, and Ralph Brugger.

Mrs. J. Archer of Beaver Lodge returned to a trip to Toronto and other Ontario points on Tuesday's passenger.

Mrs. V. McLeod of Vulcan, Alberta, was a passenger on Tuesday's train en route to Ponoka. Coupled with her sister, Mrs. Reeson.

Palmer Norment of Homestead was a business visitor to Grande Prairie on Tuesday.

Melvin Hagen of Malde was a visitor to the Prairie on Tuesday.

Jack Lewis, who was teaching at Spirit Valley, returned to his home in Grande Prairie.

SHOWERS FOR BRIDE-ELECT

A shower was given for Miss Frances Spicer, bride-elect, at the home of Mrs. Harold Oxley on June 12. Miss Spicer was the recipient of many useful gifts, utensils in colors of cream and tan. Some twenty-six guests were present. The evening was spent in contests and games and a delightful lunch was served by the hostess.

On June 26 Miss Spicer was the guest of honor of the Sewing Circle at the Hotel Grande Prairie. Exports when Miss Frances was presented with a lovely electric iron.

NEW S. A. OFFICIALS TO ARRIVE IN THREE WEEKS

Captain and Mrs. Waller have been appointed to take charge of the Grande Prairie Army corps and are expected to arrive in three weeks' time.

Adjutant Grace Eby, who had charge of the corps here, has been appointed second in command at Edmonton.

Captain Lillian Bray, who assisted Adjutant Eby in Grande Prairie, has been appointed in charge of the Camrose corps.

Miss Chrissie Johnson, who conducted the corps at the Grande Prairie Citadel until the new officers arrive.

Wedding Bells

DOLEMO-JOHNSON

A wedding of interest to the people of Valhalla and Grande Prairie was solemnized in the United Church Manse on Friday afternoon, June 23, when Julie Johnson, daughter of Orl Johnson, and John Dolemo, became the bride of Sander Dolemo, third son of Mr. and Mrs. Carl Dolemo of Valhalla. Rev. A. W. Camp officiated.

Jack Mantle supported the groom and Mrs. Mantle was bridesmaid. Following the ceremony the bridal party proceeded to the Royal Cafe, after which they drove to the home of the groom's parents, where a reception was held.

The young couple will make their home on the groom's farm at Valhalla.

BIG SPECIAL

Midsummer special on Hairdressing. Solutions suitable. 5 different prices in PERMANENTS Shampooing and Waving at Half Price

MRS. HALVERSON
West of Donald Cafe

Miss Jessie Neil left by car with the Power family on Thursday morning to spend her holidays with relatives and friends at Watrous. The Powers will visit at Saskatoon.

Hugh O'Brien, who is a medical student at McGill University, arrived Tuesday evening. He and his parents, Dr. and Mrs. O'Brien, Hugh is looking the picture of health.

Mrs. A. E. Galway, accompanied by her little son, arrived from Edmonton on Tuesday's passenger.

There was a large crowd at the station on Tuesday to bid farewell to Adjutant G. Eby and Captain L. Bray of the Salvation Army.

BORN AT MUNICIPAL HOSPITAL

To Mr. and Mrs. Edwin Sather, Wanham, June 28, a daughter.

HUDSON BAY MOVERS OFFICES

The Hudson Bay Company has been moved to the W. C. Pratt Building, west of J. B. Oliver's store.

The property on which the old company building stood has been purchased by J. W. Bird of Bird's Grocery, and on it he intends to erect a modern building in the near future.

GERRY'S WHITE OF CGFP TO JOIN STAFF OF CKLN, NELSON

On Friday "Gerry" White, who has been one of the broadcasters for CGFP for the past eleven months, will leave for Nelson, B.C., to join the staff of CKLN, Nelson.

THE TRACK MEET IS TO START AT 1 P.M.

Don't forget—The Tribune is best.

At the 19th Hole

An over-clouded sky and a slight breeze made for a cool day for golf at Richey Hill on Sunday. However, the attendance was not as large as could be expected on such a perfect day. About twenty-five players participated at one time during the afternoon.

Pro. Stevenson had the course in splendid condition and the greens were well sanded.

On the day's play no records were broken, but several players managed to get a few birdies to their credit.

The makers of Enos' Fruity Salts had a special bottle of their product for all players getting a birdie on the hole four.

"Sandy" says that to date over four thousand birdies have been scored. The last player to tally was C. C. Fleming while playing in a foursome with Harry Black, who made birdies on his one (but no salts for Harry). D. W. Pratt and like.

Public ownership of transportation was another thing the C.C.F. stood for.

Discussing the tariff, Mr. Irving said that his party proposed to abolish tariffs. He drew attention to the many millions of dollars which the people of the West have paid through the tariff.

Touching on finance, Mr. Irving said that the Canadian banks in the West from 8 to 10 per cent interest. When Canada went back to the gold standard debts immediately doubled and the farmers had to give two bushels of grain instead of one to pay their debts.

Continuing, Mr. Irving stated that the C.C.F. would like to power the nation to take over the electric companies and run them in the interest of the people.

Then Mr. Irving said, "Mr. Rowe is telling us that the C.C.F. program is only a dream. I say to you that my dream is better than that nightmare."

Then Mr. Irving stated that Norway, Sweden, Denmark and New Zealand have already put into operation the principles of the C.C.F.

MR. ALLEN

Mr. Allen referred to the incident which led up to the C.C.F. and what he did to do with an editorial which appeared in The People's Weekly.

In which Mr. Irving stated that the province was \$61,000,000. Mr. Allen challenged those figures, adding that the figure is three times too large.

Mr. Allen agreed with the principle of the clause in the C.C.F. provincial program, but especially did not agree with the plank regarding public ownership of the railroads.

Mr. Allen said that it was wrong to stand by and let the government do what it wanted to do.

The C.C.F. Mr. Allen stated, gave the impression that the government can operate more cheaply than private capital. This was said, was not necessarily so.

Mr. Allen stated that it was wrong to stand by and let the government people receive no benefits. He said that in 1934 the wholesale price of oil had been reduced 24 per cent, and further that oil companies paid their fair portion of taxes. He referred again to the attention to the fact that there had been an expenditure of \$75,000,000 in oil royalties and the companies only received \$6,000,000 back.

What would be the position of a government under such circumstances?

Mr. Allen said that it was all right to stand by and let the government do what it wanted to do, taking over various industries, but where is the money coming from?

In reply Mr. Irving said that in taking over the oil industry the C.C.F. proposed to purchase on the part of the industry the whole of its output of the product.

At the conclusion of the debate Mr. Allen asked for a few minutes to reply. Mr. Irving refused to accede to his request.

Referring to the packing plants, Mr. Allen said that the farmers were at the mercy of the packing plants so far as grading was concerned. He admitted that they were in point of price.

Briefly, Mr. Allen said that it was all right to stand by and let the government do what it wanted to do, taking over various industries, but where is the money coming from?

In reply Mr. Irving said that in taking over the oil industry the C.C.F. proposed to purchase on the part of the industry the whole of its output of the product.

At the conclusion of the debate Mr. Irving refused to accede to his request.

Interest in the debate during the question period many questions were asked.

Something Extra

Harriet: "I'm the happiest woman in the world. I'm marrying the man I love."

Nelly: "Oh, that's nothing! True happiness comes to a girl who marries the man somebody else wants!"

Paper Money

"There are only two people in

the audience. Wouldn't it be better to give them their money back?"

"Impossible—they have complimentary tickets."

Can't Blow Your Horn in Brussels

Brussels, Belgium, has banned blowing of automobile horns at any time.

Tribune Classified Ads pay big dividends to thrifty buyers.

Track Meet a Feature At G.P. Sports July 1

The following Track Meet will be held on the Sports Grounds, Recreation Park, Grande Prairie, on Saturday, July 1, under the auspices of the Grande Prairie Athletic Association. The Track Meet is for students from the ages of 14 years to 25 years.

CLASS "A" BOYS

19 Years to 25 Years

100 - Yards

220 - Yards

Pole Vault

High Step and Jump.

Running Broad Jump.

High Jump.

CLASS "A" GIRLS

18 Years and Over

100 - Yards

150 - Yards

High Jump.

The points awarded in each event will be for a first, 3 points, second, 2 points; third, 1 point.

A Special Half Mile Race will be held for 18 years and over. A Cup will be awarded to the winner, also a second prize.

All entries who are interested and want to please get in touch with the following committee as soon as possible:

Art Southworth, at Sloane's Drug Store, Grande Prairie.

Dennis Law, at the Court House, Grande Prairie.

Wm. Ross, at the Telephone Office, Grande Prairie.

THE TRACK MEET IS TO START AT 1 P.M.

(Continued from Page One)

nations, he said, control 75 per cent of the world's coal, and 85 per cent of the world's coal. This condition, he said, leads to conflict.

After referring to the number of bank branches that had been closed because of the depression, Mr. Rowe disagreed with the statement that the banks were cause of most economic trouble.

The banks, he observed, were glutted with money, their being on deposit in Canada a billion and a half dollars. The trouble, he said, was there was no demand for money for commercial and development purposes.

Mr. Rowe referred to stimulate industry and put men to work. Mr. Downing, Dominion Minister of Finance, proposed to subsidize factories for construction, to subsidize factories for construction, to help manufacturers, while many firms are so compactly built that they can be carried in a pocket at all times.

Operation has been made more convenient to all so that the banks can be used to the maximum advantage.

For the international situation, Mr. Rowe said that the C.C.F. is functioning democracy. Duplication of plants, foolish competition and fluctuation of the price of labor are the chief disadvantages of the present system.

A planned economy is necessary if the problems which confront the Canadian people are to be overcome.

Mr. Rowe said that the C.C.F. program is only a dream. I say to you that my dream is better than that nightmare."

Then Mr. Irving said, "Mr. Rowe is telling us that the C.C.F. program is only a dream. I say to you that my dream is better than that nightmare."

Speaking of international war, Mr. Rowe said that for many years he had rubbed shoulders with practically every man in the world, and he never met a man who worked with him.

Mr. Irving said, "The common people of a nation have no quarrel with the common people of another nation, and are opposed to driving people to starvation because of a stupid, immoral economic system, such as exists in the world today."

In conclusion Mr. Rowe said:

"The world, through the setting up of self-sufficiency programs—the result of which is to reduce unnecessary imports, exchange quotas, etc., has turned thumbs down on Alberta's exports. Alberta is incomparably the richest in the world, and sustain a population of millions, as well as providing the outside world with oil, coal and its by-products, etc.

The C.C.F. government will be able to do what it wants to do, and to do it in the same way that the Aberhartites did."

Speaking of international war, Mr. Irving said that in 1937 the oil price had been reduced 24 per cent, and further that oil companies paid their fair portion of taxes. He referred again to the attention to the fact that there had been an expenditure of \$75,000,000 in oil royalties and the companies only received \$6,000,000 back.

What would be the position of a government under such circumstances?

Mr. Allen referred to the incident which led up to the C.C.F. and what he did to do with an editorial which appeared in The People's Weekly.

In which Mr. Irving stated that the province was \$61,000,000. Mr. Allen challenged those figures, adding that the figure is three times too large.

Combine photography with your sports or other hobbies... for studies of "fern" in golf, in wild-life studies if you're a hiker... and so on. Picture almost any other hobby.

Printers' Errors

(From The Shauna Standard)

We don't like to brag, but on the average The Standard contains few errors, but last week our proofreaders and printers were somewhat slack in the work. One of the funniest errors we had was in the article on "Learn to Swim," wherein we said "Always inhale through the nose and exhale through the mouth." We also had the Centre Street Church choir practising at 15 min. after midday. "Clever thinking is the only solution of democratic problems" is another that escaped the eagle eyes of our proofreaders, salvation being the word. In J. A. Innes Ltd. ad Father's Day was set back three days (poor father). From now on we'll feel subdued when we notice errors in other publications. However, ours are no worse than the following mentioned in the Malta (Monte) News:

The following odd ceremony must have been caused by a typographical error. In any event an Ohio paper burst forth with "Filomena Club will meet in May at Smiley's Smiley's Road. Thursday at 2:15 p.m. Roll call will be favorite flowers and there will be an exchange of pants." The following week we took to the head of the list of such printers' mistakes is this one: "The last scheduled meeting of the old board will be held on Saturday, June 24, at the Councilman Inn, Grande Prairie, at 8 p.m. The chairman — will hand over to his successor his official cutlery."

Reporting a church affair, the same paper said "Dr. ... will be the new minister of the men's Bible class, said he had \$5 in his pocket when he went to the church building. Said: 'I am poor, but the good Lord has provided for me.'"
